Sana Iqbal - AI/ML Engineer

Freelance ai/ml engineer with 20 delivered client projects.
Skills: Docker, FastAPI, Hugging Face, LangChain, LangGraph, MLOps, OpenAI API, Pinecone, PyTorch, Python, RAG, scikit-learn

Experience:
2026: Deploy ML model behind FastAPI (fintech) - reduced cloud costs by 42%.
2026: Fine-tune an LLM for ticket triage (manufacturing) - reduced cloud costs by 33%.
2026: Computer vision defect detector (real estate) - reduced cloud costs by 42%.
2025: Fine-tune an LLM for ticket triage (education) - cut processing time by 56%.
2025: Recommendation model for e-commerce store (logistics) - raised conversion by 27%.
2025: Computer vision defect detector (real estate) - cut processing time by 18%.
2025: Deploy ML model behind FastAPI (healthcare) - cut processing time by 48%.
2025: Build a RAG chatbot over our support docs (e-commerce) - cut processing time by 48%.
2024: Recommendation model for e-commerce store (travel) - saved the team 37 hours a week.
2024: LangGraph agent for invoice processing (healthcare) - cut processing time by 44%.
2024: Fine-tune an LLM for ticket triage (legal) - reduced cloud costs by 27%.
2023: Fine-tune an LLM for ticket triage (education) - reduced cloud costs by 42%.
2023: Deploy ML model behind FastAPI (logistics) - raised conversion by 42%.
2023: Deploy ML model behind FastAPI (legal) - cut processing time by 19%.
2022: LangGraph agent for invoice processing (healthcare) - saved the team 37 hours a week.
2022: Fine-tune an LLM for ticket triage (fintech) - saved the team 46 hours a week.
2022: Build a RAG chatbot over our support docs (manufacturing) - raised conversion by 52%.
2022: Deploy ML model behind FastAPI (manufacturing) - saved the team 15 hours a week.
2022: Fine-tune an LLM for ticket triage (e-commerce) - raised conversion by 21%.
2022: Recommendation model for e-commerce store (healthcare) - reduced cloud costs by 53%.

Education: BSc Computer Science.
